

Facility Report for AGM 2024

There were many improvements were made this facility this year. As planned, we replaced the drywall at the north wall of the Gallery, and gave the whole Gallery a fresh coat of paint. We also improved the look of some of the larger pedestals by replacing the worn pegboard surfaces with a more modern surface.

Flowers in the planters outside always attracts attention and thanks to Cindilla Trent for her hard work to keep them blooming through the changing weather.

Barb Sayles continues to keep our Breezeway decorated, and it's always so inviting and interesting.

We had to replace an air conditioner unit, and we made improvements to the exhaust venting for the two units. This made it cooler and more efficient in the gallery during the hot summer days.

The floor in the breezeway was raised for a safer access, and the flooring was replaced.

The entrance space was also rejuvenated with new paint. The grubby, tired entrance was transformed into a professional, clean welcoming space by Kristina Brewer. Thank you for your hard work, including the work to reorganize the studio, kitchen storage, and shelves in the stairwell.

The Clubhouse has rented several times by outside groups, and the Facility Calendar was created to organize the scheduling of our spaces.

Thanks to all our volunteers for helping with the improvements to our facility! This work would not be possible without your help.

Angela Ho

Facilities Director
